SUMMARY

I am an Advanced Level student with a strong passion for software development and backend engineering. Beyond my school studies, I actively build real-world projects to strengthen my programming skills and gain practical experience. I have hands-on experience developing RESTful APIs using JavaScript, Node.js, Express.js, PostgreSQL, Sequelize ORM, and JWT authentication. I enjoy learning new technologies, solving challenging problems, and continuously improving my skills through personal projects and open-source development on GitHub. I am seeking opportunities where I can learn from experienced professionals while contributing to meaningful software projects.

PROJECTS

Library Management API

GitHub: <https://github.com/niyogado/library-api>

A backend application developed using Node.js, Express.js, PostgreSQL, and Sequelize ORM to manage library operations.

Key Features

- Secure user registration and login using JWT authentication.
- CRUD operations for library resources.
- Relational database design with PostgreSQL and Sequelize.
- Continuous feature-by-feature development with version control on GitHub.
- RESTful API architecture following backend development best practices.

Personal Portfolio Website
